

“Gaza Ceasefire Flyer.pdf” can be printed double sided on letter-sized paper

“Gaza Ceasefire 2x Flyer.pdf” can be printed, in landscape mode (a “flip on long edge” option, or equivalent, may need to be enabled for correct orientation of the reverse sides)

If you wish to alter the flyers, please make a copy of the following Canva document, alter it, and export a custom PDF from it:

<https://canva.link/z03u60evgzj1van>

To make the 2x versions, you should import the pages from the full sized version into a landscape oriented layout document in appropriate software you have access to (we have used Apple Pages), then crop/arrange them as shown in “Flyer x2 Template.pdf”. Export a new x2 pdf from your newly assembled layout document. For your reference, we’ve included the “Gaza Ceasefire 2x Flyer Layout.pages” in this folder.
