

Printouts from the “Gaza Ceasefire Panels.pdf” file in this “Tri-fold” folder can be used to assemble a tri-fold display board that looks like this:

To achieve the centre panel above, the first two pages of the PDF file were reassembled into a landscape document “Gaza Ceasefire Oversize Central Elements.pdf”, printed out on landscape paper, then cut and assembled to fill the centre panel of the trim-fold display. The sides of the display board are populated with pages printed directly from “Gaza Ceasefire Panels.pdf”

If you wish to alter these panels, please make a copy of the following Canva document, alter it, and export a custom PDF from it:

<https://canva.link/eu95sibs6pc3n5m>

You may also need to create your own version of “Gaza Ceasefire Oversize Central Elements.pdf”. In our case, we imported the pages from the main PDF into a Pages document (available on iOS and macOS), and assembled it there. We include “Tri-fold Oversize Layout.pages” for your reference.
